

Declaration of REACH 1907/2006 (EC) Regulation

Gisors, 22th of December 2022

We, the undersigned Société Méca-Inox, certified ISO 9001 version 2015 and acting as a manufacturer of ball valves, certify that in view of the documents which have been communicated to us by our suppliers under the articles, these latter comply to:

Regulation (EC) "REACH" - Registration, evaluation, authorization and restriction of chemical substances (1907/2006)

Within the meaning of the REACH regulation, Méca-Inox is an importer and downstream user of chemical substances. As part of this, we have certain responsibilities under REACH.

According to our information, and as an importer of products from outside the EU, we do not have to register because we do not import specific chemical substances of a quantity equivalent to a weight greater than 1 ton / year.

As a downstream user and with regard to the information provided by our suppliers, we have made sure of any pre-registration of substances present in our valves, in order to anticipate a possible future disappearance.

Following the responses from our suppliers regarding REACH, we inform you that our valves do not contain more than 0.1% by weight of any of the substances of very high concern as specified in the candidate list (see <https://echa.europa.eu/fr/candidate-list-table>), according to article 59 §10 of the REACH regulation
